

Six ways to make the house work

Three internal layouts within the current Proposed envelope, and three complete alternatives that retain more of the original house.

THE FULL BRIEF

Seven bedrooms, en suites for most, a large principal suite with study, walk-through wardrobe and bathroom; open-plan kitchen and living, gym, cinema, wine bar, pool, double garage and four outside parking spaces.

STARTING POINT

E1 - Retained front is the first option to explore for fewer changes to the original house. It keeps the front, entrance, main stair, garage and fountain. Its retained garage is a tight double for compact cars. E2 offers a larger dedicated principal suite and garden leisure wing without a basement. E3 retains the most complex construction and front-building-line questions.

READ THE OPTIONS

I1 - Garden kitchen	Internal layout 6 en suites
I2 - Social east	Internal layout 5 en suites
I3 - Garden principal	Internal layout 6 en suites
E1 - Retained front	Complete redesign 6 en suites
E2 - Garden courtyard	Complete redesign 5 en suites
E3 - Short forecourt wing	Complete redesign 5 en suites

Each option begins with a short explanation, followed by its floor plans and site arrangement. The current Existing, Proposed and planning designs remain separate choices in the browser.

These are concept studies, not application or construction drawings. Planning acceptability, structure, fire strategy, services and site levels require professional design and a measured survey.

Garden kitchen

A kitchen at the heart of the garden

7 bedrooms | 6 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

INTERIOR HIGHLIGHT

WHY IT WORKS

Everyday cooking and dining beside the pool, while keeping the current principal suite and leisure spaces.

- The rear room becomes the main kitchen and dining space, connected to family living in the side wing.
- The existing kitchen stays useful as a prep kitchen and pantry, close to the original services.
- An extra shower room gives six of the seven bedrooms private bathrooms.

WHAT STAYS

Current Proposed external walls, roofs, principal suite, gym, cinema, wine bar, pool and garage.

WHAT CHANGES

Internal refitting, kitchen services and one additional en suite within the current Proposed envelope.

GARDEN

THE TRADE-OFF

- Shopping travels farther from the garage to the main kitchen.
- The current Proposed front wing, basement and roof terrace remain; the external planning case is unchanged.

Principal suite

Current front principal suite, with separate study, walk-through dressing and private bathroom.

PLANNING FOCUS

Internal alternative only. It inherits the massing, roof-terrace and neighbour-impact issues of the current Proposed scheme.

PARKING

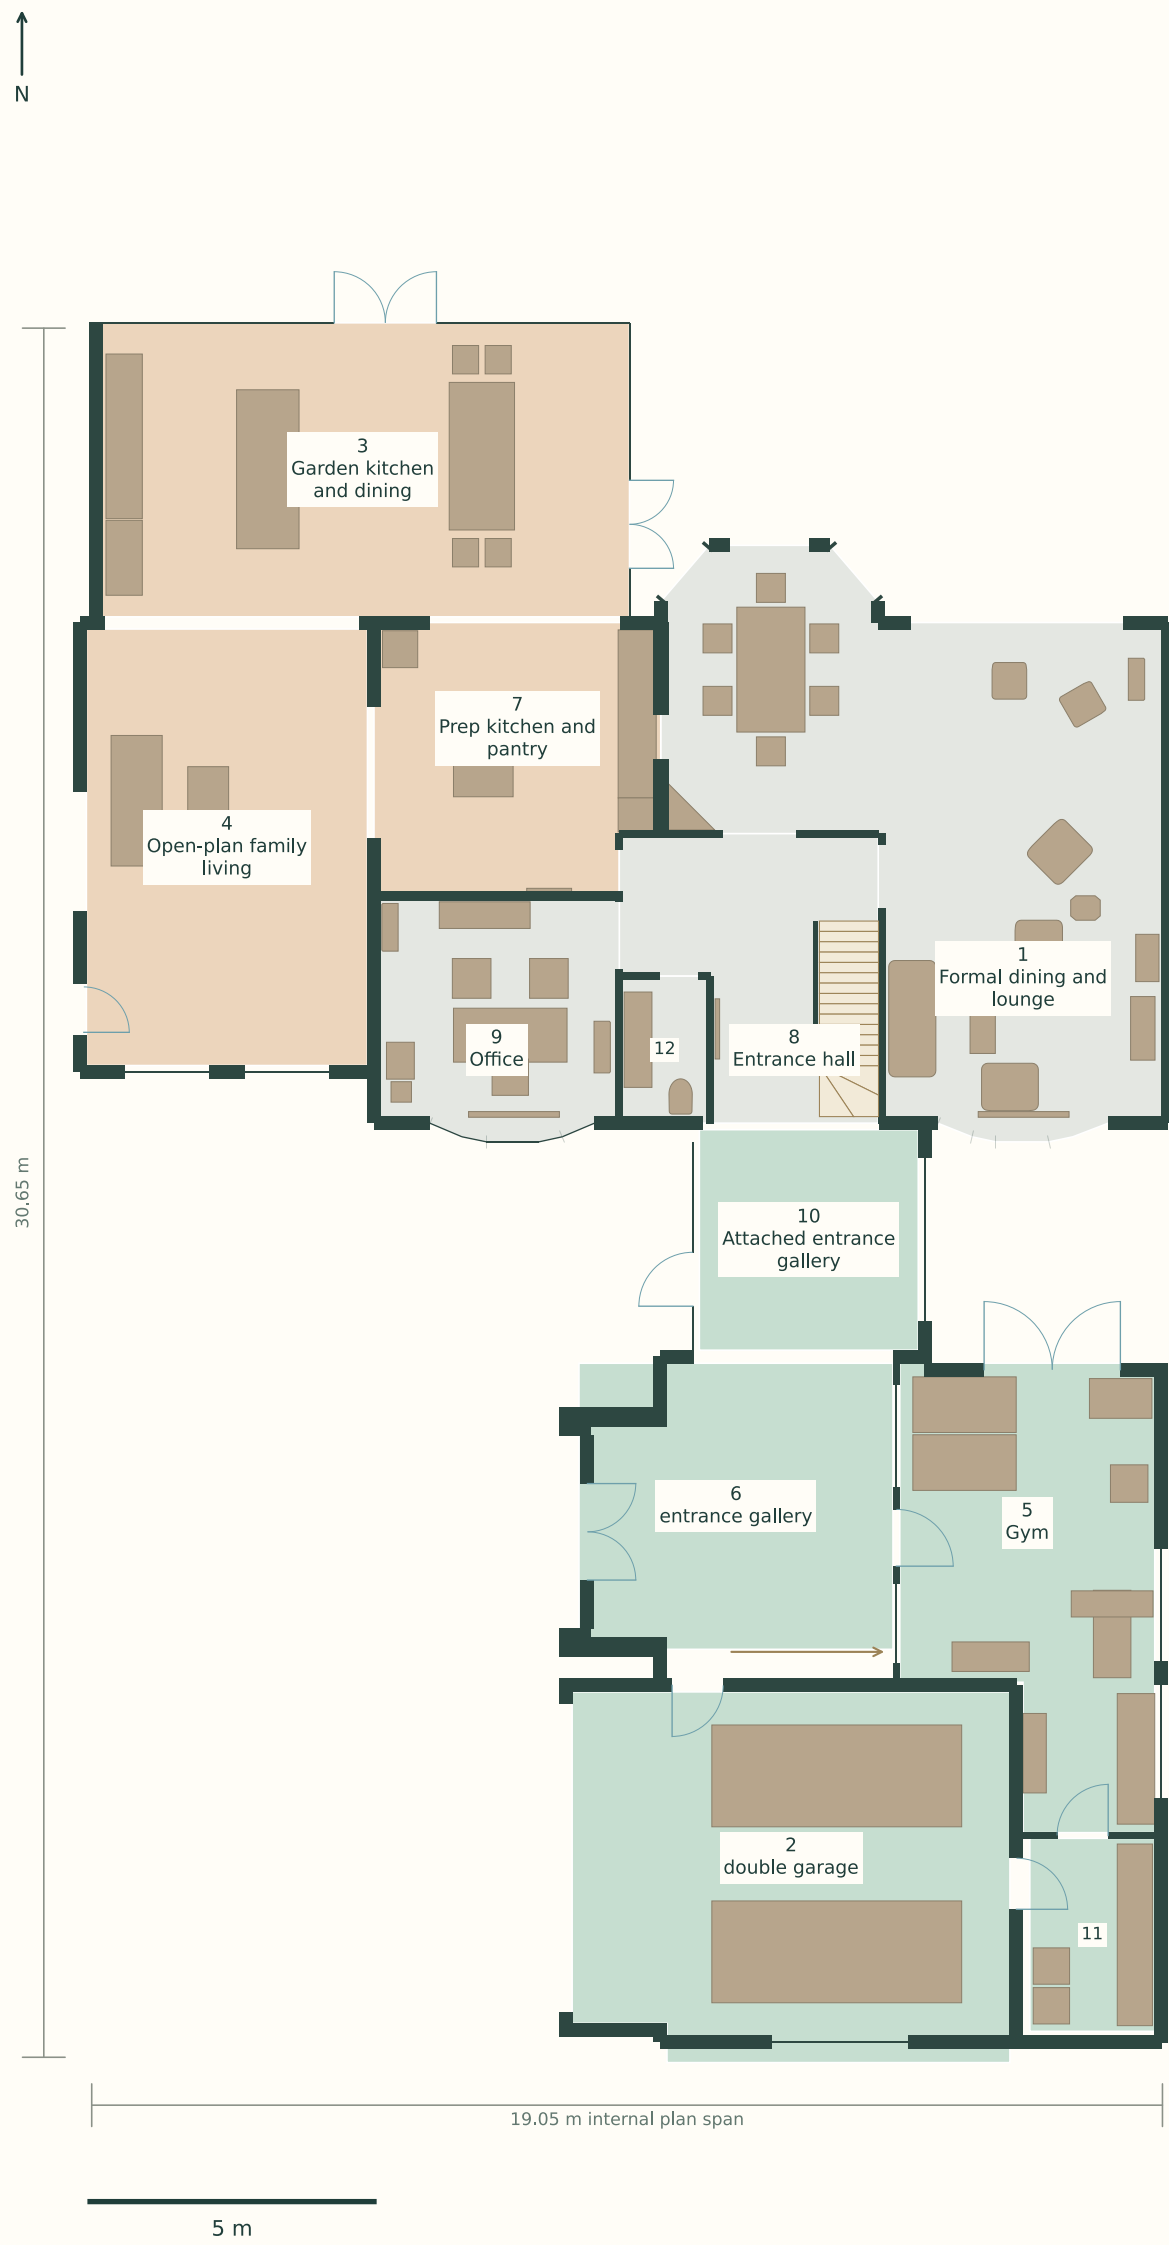

Four outside spaces plus the current double garage. Compact-car tracking; the retained south bay is only about 4.65 m long.

Six main-floor bedrooms plus one loft guest bedroom; six en suites. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

Site arrangement · Concept design

Grey Original footprint | Sand Added footprint | Hatched Pedestrian zone

Blue dashed New upper floor | F Fountain

Four outside spaces + double garage. Cars shown at 4.4 × 1.8 m; doors and gradients need detailed design.

Boundary and levels follow the reconstructed project. Tree positions, root protection, drainage and road tie-in require survey.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Social east

Social rooms on the east, a guest suite downstairs

7 bedrooms | 5 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

INTERIOR HIGHLIGHT

WHY IT WORKS

A main kitchen connected to the original east living and dining rooms, with a bedroom available on the ground floor.

- Kitchen, dining and sitting share the east side of the original house.
- The former front gym becomes a guest suite with a private shower room and an independent service passage alongside it.
- The cinema moves into the original ground-floor family room; the side wing holds the gym and a shared family workspace.

WHAT STAYS

Current Proposed envelope, front principal suite, pool, double garage and original staircase.

WHAT CHANGES

New kitchen, one wide internal opening, ground guest bathroom and room refits; the current outer envelope stays.

GARDEN

THE TRADE-OFF

- The cinema is a smaller four-seat room; the gym takes the side garden living room.
- The old basement remains as wine-bar and games space, so this is not a reduction in construction scope.

Principal suite

Current front principal suite, study, walk-through dressing and bathroom retained.

PLANNING FOCUS

External form remains the current Proposed design. Moving rooms does not resolve its front-wing, terrace or basement concerns.

PARKING

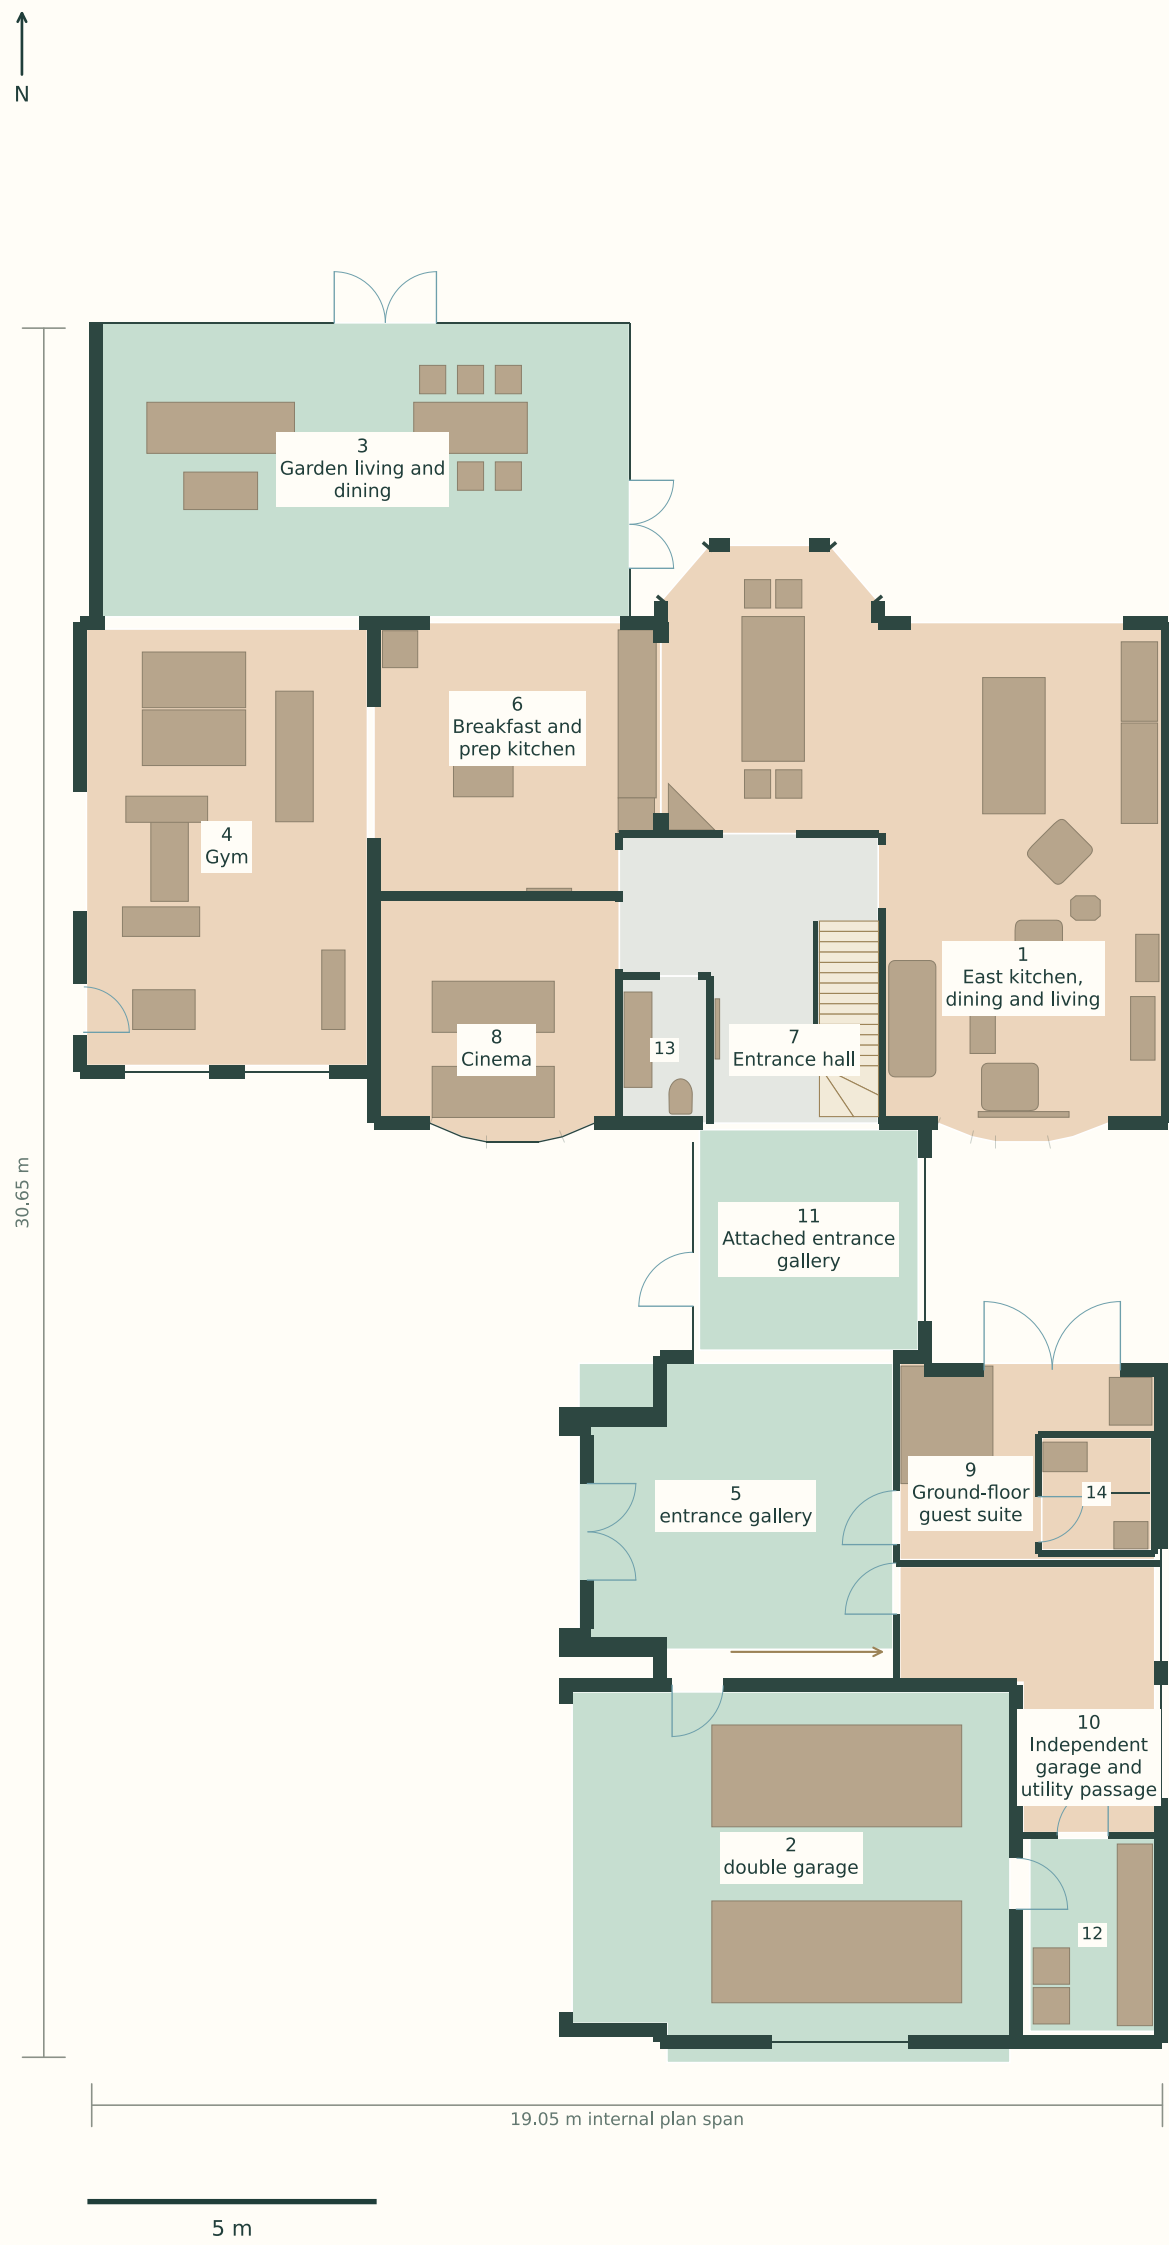

Four outside spaces plus the current double garage; compact-car tracking and a short retained south bay.

Five first-floor bedrooms, one ground-floor guest and one loft guest; five en suites. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Garden principal

A quieter principal suite facing the garden

7 bedrooms | 6 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

INTERIOR HIGHLIGHT

WHY IT WORKS

A garden-facing principal bedroom and pool-side gym, with the front wing used for guests.

- A single new doorway links the original east bedrooms into a principal bedroom, study and walk-through dressing suite.
- The generous current front principal area becomes two guest suites.
- The existing kitchen opens more widely to side living; the rear glazed room becomes the gym, beside the pool.

WHAT STAYS

Current Proposed envelope, original principal partition with a new doorway, pool, basement cinema, double garage and main stair.

WHAT CHANGES

One principal-suite doorway, a wider kitchen opening, two front guest suites and room refitting.

GARDEN

THE TRADE-OFF

- Everyday living loses the rear glazed room to the gym.
- The current Proposed envelope, basement and roof terrace remain, with their existing planning and construction implications.

Principal suite

Garden bedroom and retained bathroom, entered through the original front-east room with study and walk-through wardrobes.

PLANNING FOCUS

The external proposal is unchanged. Structural design is needed for the new internal openings.

PARKING

Four outside spaces plus the current double garage; compact-car tracking and a short retained south bay.

Six main-floor bedrooms plus one loft guest; six en suites. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Retained front

Keep the front, garage and arrival sequence

7 bedrooms | 6 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

FRONT ARRIVAL

WHY IT WORKS

The strongest starting point for reducing changes to the original house while keeping the full brief.

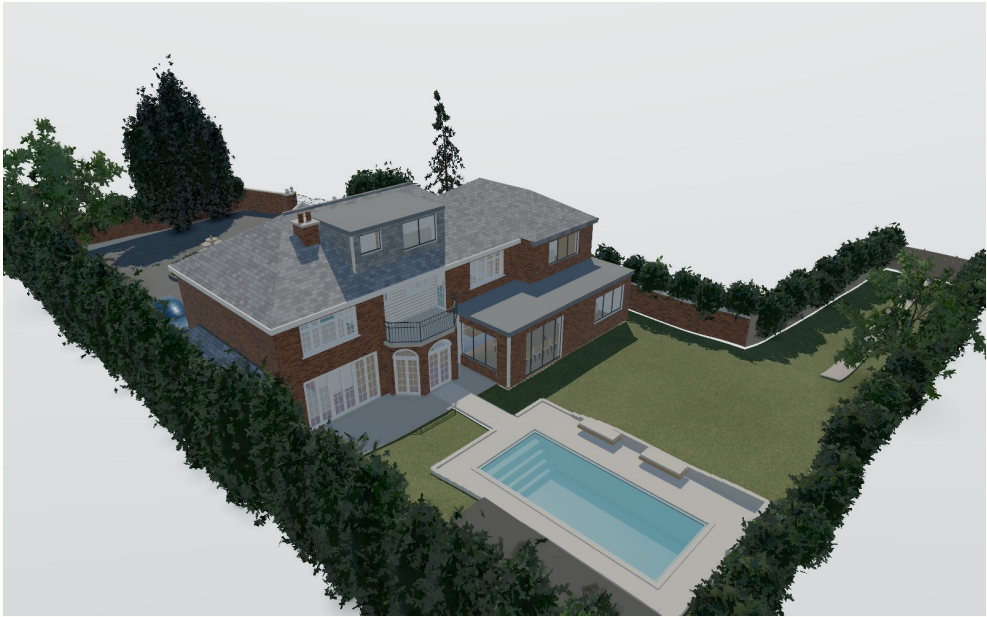

- The original front, entrance, main stair, double garage and fountain stay in place.
- A 3.8 m rear addition links to the original kitchen, making about 60 m² of connected kitchen, dining and living space.
- Gym, cinema and wine bar reuse original ground-floor rooms. There is no new basement or roof terrace.

WHAT STAYS

Original main facade, entrance, main stair, double garage, fountain, main roof form and chimney; most original walls.

WHAT CHANGES

Rear family room, two bedrooms over the garage, original-roof loft conversion and targeted internal alterations. Pool and forecourt grading are additional site work.

GARDEN

THE TRADE-OFF

- The original garage is only about 4.95 m wide inside: a tight double for compact cars, with door-opening clearance still to resolve.
- A side upper floor and rear dormer are still substantial work; the garage foundations and roof junction need engineering.

Principal suite

Original east bedrooms form a garden-facing bedroom, study and walk-through dressing; the existing principal bathroom stays.

PLANNING FOCUS

The retained front, lower side ridge and 3.8 m rear depth are a starting point. The low flat rear roof needs justification against the council guidance; side bulk, dormer scale, neighbour light and privacy remain open.

PARKING

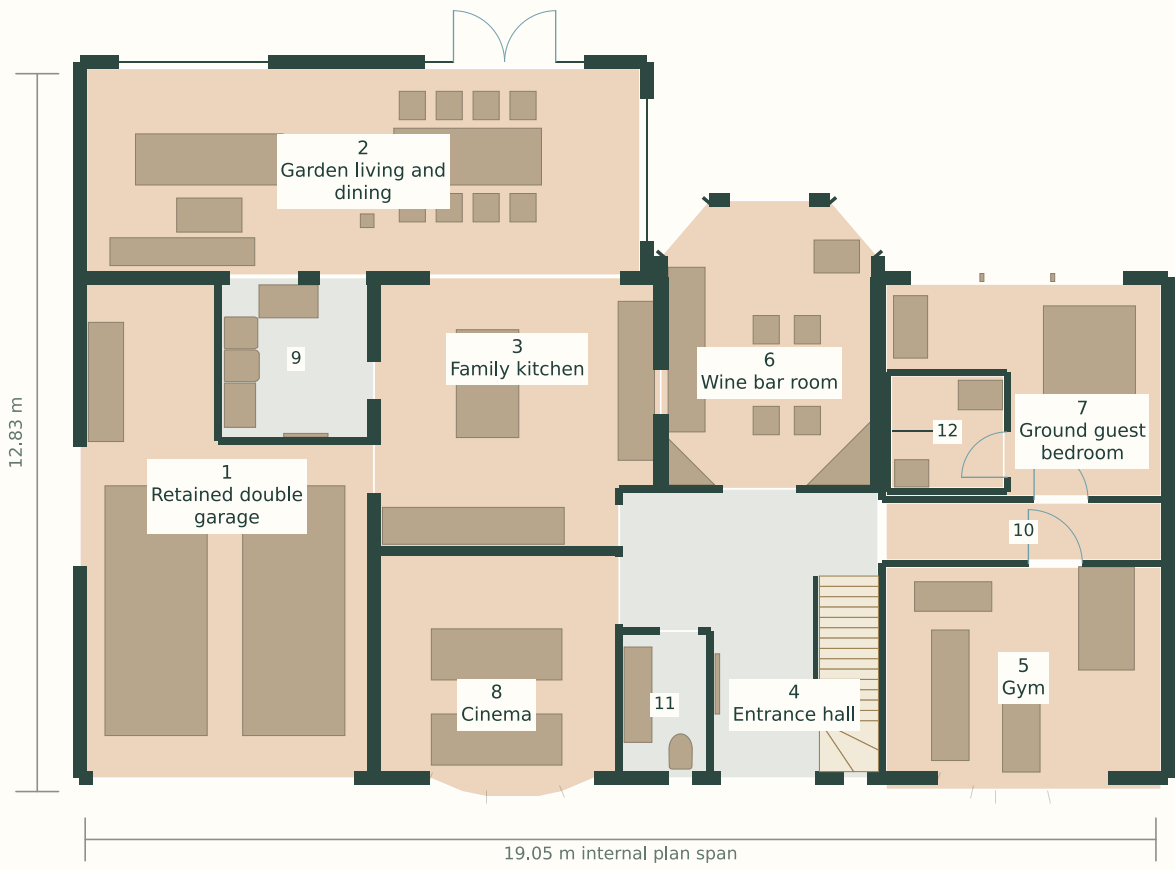

Four outside bays plus two compact cars in the retained garage. Reverse G2 into its bay so both right-hand-drive seats face the 0.625 m central aisle; six occupied-bay vehicle routes and 0.50 m pedestrian routes are checked. Actual car-door opening still needs a physical trial.

Five first-floor bedrooms, one ground guest and one loft guest; six en suites. The loft guest room is compact, about 9.6 m² excluding its en suite. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

E1 / Retained front

Site arrangement · Concept design

Grey Original footprint | Sand Added footprint | Hatched Pedestrian zone

Blue dashed New upper floor | F Fountain

Four outside spaces + double garage. Cars shown at 4.4 × 1.8 m; doors and gradients need detailed design.

Boundary and levels follow the reconstructed project. Tree positions, root protection, drainage and road tie-in require survey.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Garden courtyard

A garden principal suite and a low leisure wing

7 bedrooms | 5 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

FRONT ARRIVAL

WHY IT WORKS

A larger dedicated principal suite and garden leisure rooms without basement excavation.

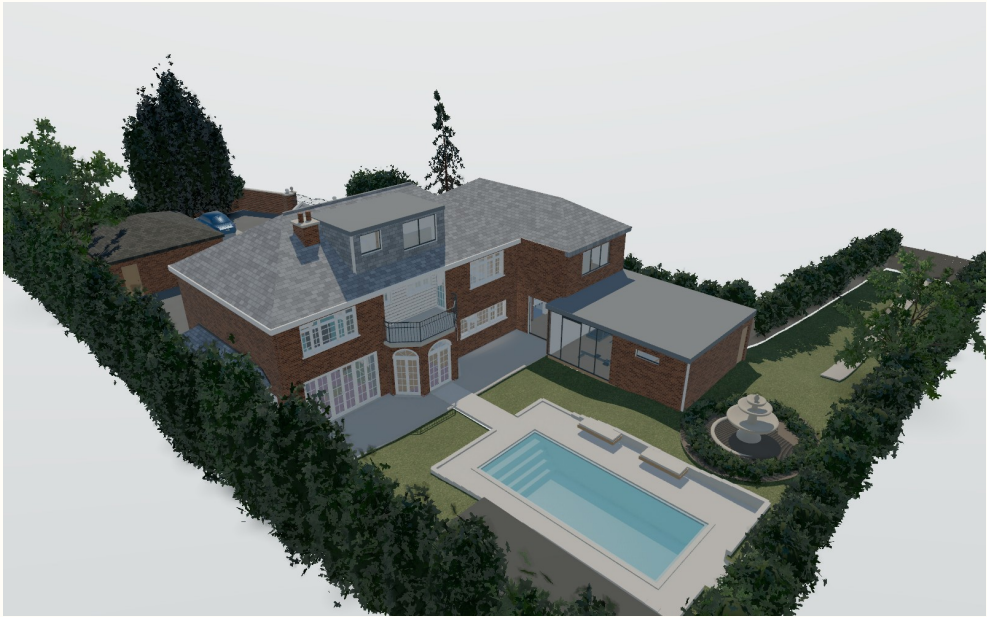

- The original front and four larger first-floor bedrooms remain; the new principal suite occupies the side upper floor.
- The original kitchen and converted garage provide connected family living and dining.
- A low rear wing separates gym and cinema from the main rooms; the garden link adds pool changing and a visitor shower room.

WHAT STAYS

Original front, entrance, main stair and four larger original first-floor bedrooms; main roof ridge and chimney.

WHAT CHANGES

Garage conversion, side upper floor, low garden link and leisure wing, original-roof loft conversion and detached garage. No basement or roof terrace.

GARDEN

THE TRADE-OFF

- The side floor projects 3.2 m behind the original house, and the low leisure wing continues farther into the garden.
- A detached double garage changes the forecourt. The fountain moves to the rear garden.

Principal suite

Study and bathroom at the front, a generous walk-through wardrobe in the middle, and the bedroom facing the garden.

PLANNING FOCUS

The original front stays, but the long low rear wing and forecourt garage need a strong siting case. Its flat rear roofs need justification against council guidance, alongside tree, light and privacy checks.

PARKING

Four outside bays plus a detached garage with about 6.97 m clear width and 6.67 m clear depth. Six occupied-bay routes checked with a compact car.

Five first-floor bedrooms, one ground guest and one loft guest; five en suites. The loft guest room is compact, about 9.6 m² excluding its en suite. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Short forecourt wing

A shorter front wing with leisure rooms below

7 bedrooms | 5 en suites | Pool + gym + cinema + wine bar | 2 garage + 4 outside

FRONT ARRIVAL

WHY IT WORKS

Keeping the current proposal's separate front-suite approach while reducing its length and removing its occupied front loft.

- A shorter front wing holds the double garage, gym and utility below two bedroom suites.
- Four original bedrooms and one side bedroom remain, so all seven bedrooms sit on the main first floor.
- Cinema and wine bar use the cellar beneath the new wing; the original loft is a workspace only.

WHAT STAYS

Original house walls, main stair, four larger original bedrooms and main roof ridge.

WHAT CHANGES

Two-storey front wing with cellar, two-level link to the original entrance/landing, one side bedroom and a 3.2 m rear living addition.

GARDEN

THE TRADE-OFF

- Basement excavation, waterproofing and a new front wing remain significant construction work.
- The front building line changes substantially. This is the most difficult planning argument of the three complete redesigns.

Principal suite

Front-wing study leads through a walk-through wardrobe to the large bedroom and private bathroom.

PLANNING FOCUS

The front ridge is lower, but the substantial forward projection remains the main planning concern. Rear flat-roof form, street character, trees, neighbour effects and basement works also need assessment.

PARKING

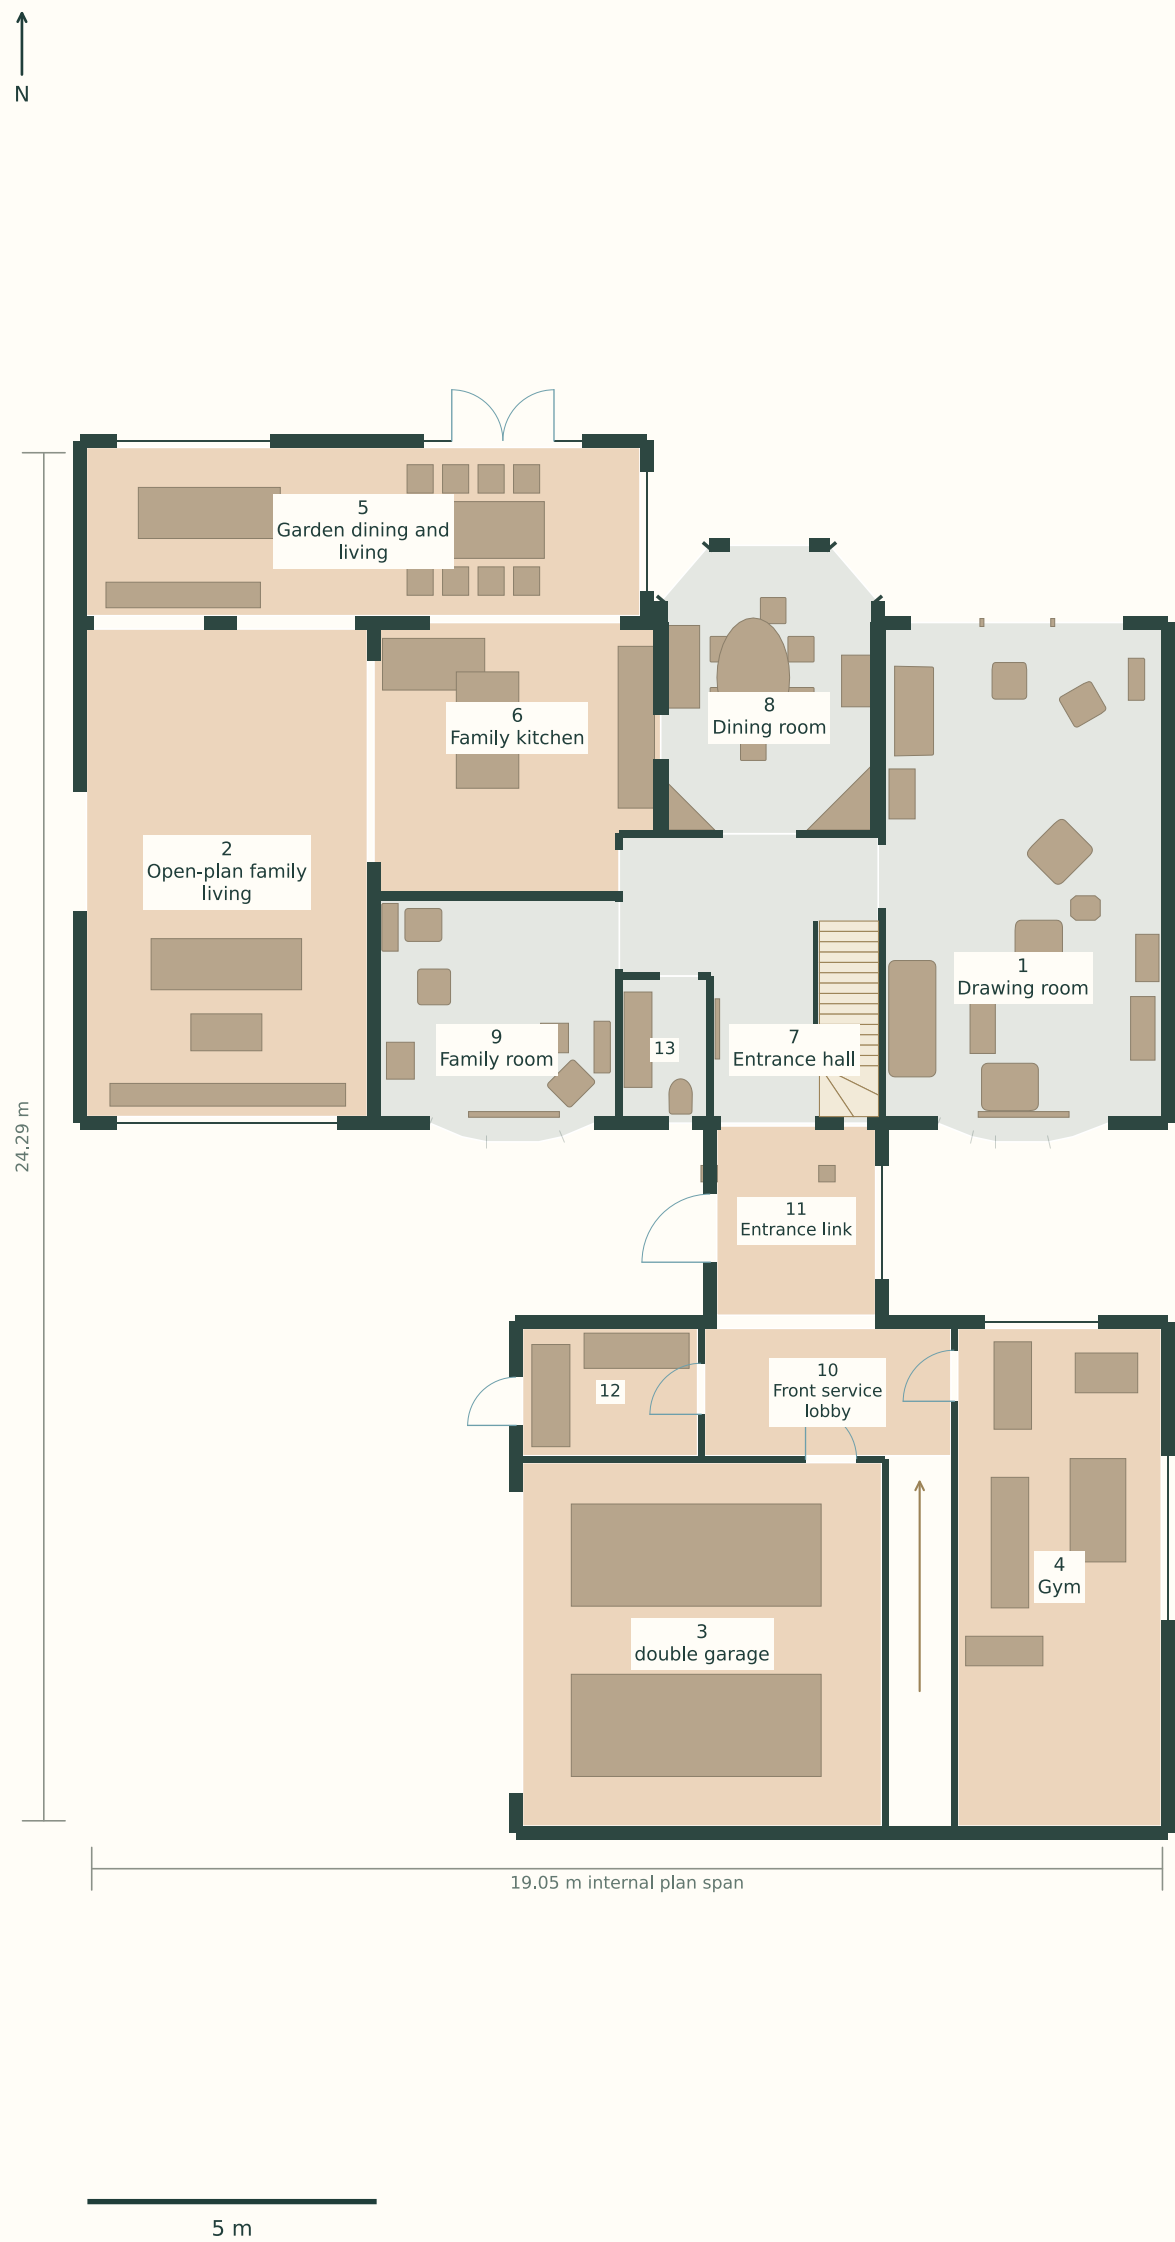

Four outside bays plus a new garage with about 6.33 × 6.41 m clear floor space. All six compact-car routes checked with other cars occupied.

Seven first-floor bedrooms; five en suites. Loft workspace only, with low eaves clearly shown. Floor areas on the following sheets are approximate room polygons, not surveyed gross floor area.

Site arrangement · Concept design

Grey Original footprint | Sand Added footprint | Hatched Pedestrian zone

Blue dashed New upper floor | F Fountain

Four outside spaces + double garage. Cars shown at 4.4 × 1.8 m; doors and gradients need detailed design.

Boundary and levels follow the reconstructed project. Tree positions, root protection, drainage and road tie-in require survey.

All plans use the same site extent. Footprints are approximate room envelopes, not surveyed gross floor areas.

Design basis and next decisions

PLANNING CHARACTER

The Sevenoaks character assessment places Ashley Close in F05 Vine Avenue / Ashley Road: detached houses, spacing, setbacks and mature planting. E1 and E2 retain the main front, but their side and rear additions still need neighbour-impact assessment. E3 changes the front building line substantially. I1-I3 inherit the current Proposed envelope and its planning risks.

SITE AND GROUNDWORKS

The owner confirms the site is outside the Green Belt. Council map screening and the nearby tree order are explained on the next page. Local heritage, setting effects and other flood sources remain open. E1-E3 use a levelled concept forecourt and retaining edges; the reconstructed terrain implies up to about 0.92 m of local cut and 0.27 m of fill. Pool terraces also require groundworks; the final terrace loop leaves at least 0.94 m beside the coping, retaining edges and loungers. The pool remains 8 x 3.5 m. Tree roots, drainage falls, boundary levels and the gate/road tie-in require a topographical and tree survey.

ROOM AND STAIR CHECKS

All six options have connected access to scheduled rooms in the navigation model at a 44 cm body width. Bedrooms and shared rooms are also checked with the other sleeping rooms unavailable, to avoid routes through someone else's bedroom. Each counted en suite is reachable within its own suite, without using a shared landing. New stairs were walked continuously in both directions at a 50 cm body width. The new loft-stair mesh has a 2.24 m sampled centre minimum and 1.98 m near-edge minimum. The latter is below the usual 2 m guidance, so applicability of the reduced loft provision in Approved Document K, Diagram 1.4, requires Building Control review. The E3 cellar stair samples give 2.58 m headroom. These checks do not establish a fire or structural strategy.

PARKING CHECKS

The complete redesigns have six compact-car positions, each tracked on entry and exit with the other cars occupied. The body is 4.4 x 1.8 m and the turning radius 4.3 m. Swept bodies were sampled every 0.10 m with a 0.03 m body margin. E1 needs a tighter planner margin and opposite garage-car headings, putting both right-hand-drive seats beside the 0.625 m central aisle. All three garages have 0.50 m pedestrian routes from nominal driver positions to the forecourt. This does not prove vehicle-specific door opening, SUV fit, gradients or highway visibility. The internal options add a fourth outside bay but retain the current garage.

LOFT AND BEDROOM BRIEF

I1-I3, E1 and E2 contain one loft guest bedroom within the seven-bedroom total, plus a separate workspace. E3 has seven first-floor bedrooms and workspace only in the original loft. Low eaves must not be treated as full-height rooms. The new E1/E2 rear dormer has 2.10 m concept clear height; roof construction, insulation, escape and ventilation remain to be designed.

What the council maps tell us

CONSERVATION AREA AND ARTICLE 4

Using the existing approximate registration of the model to British National Grid, the reconstructed title polygon does not overlap the council's mapped conservation or nearby Article 4 areas. The Vine conservation area is about 98 m away; mapped Article 4 records 20/009/ART4 and 20/007/ART4 are about 42 m and 89 m away. The published conservation boundary plan corroborates the location outside The Vine. This is a map screening, not a formal land-charge search or proof of permitted-development rights.

A SPECIFIC TREE ORDER BESIDE THE SITE

The council's current GIS marks TPO 19 of 1987 (87/019/TPO) as confirmed. The order schedule identifies T4 as cherry and G1 as seven lime, one beech and one birch, originally in the rear garden of 57 Hitchen Hatch Lane. Its T4 map symbol reaches across the reconstructed east/rear plot edge, while G1 is mapped just beyond the east side. The symbols are not surveyed stems, actual crowns or root-protection areas; they do not establish tree ownership.

IMPLICATIONS FOR EVERY OPTION

The pool and its excavation, terrace foundations, retaining edges, service trenches, forecourt grading and contractor access must be checked against a measured tree survey and root-protection design. Identify the surviving T4 and G1 trees with the council/arboriculturist before fixing those works. The model's clipping or moving of approximate tree geometry is not consent for tree work. All six layouts remain concepts pending this check.

RIVER/SEA FLOODING AND STATUTORY HERITAGE

The current Environment Agency Flood Zones dataset returns no Zone 2 or 3 polygon within the reconstructed plot plus a 100 m margin, supporting a river/sea Zone 1 map screening. Historic England NHLE mapping shows no listed-building point or polygon on the plot; the nearest is Grade II Vine View, about 269 m away. The present-day and 2070s upper-end surface-water spatial-planning maps also show no mapped extent across the approximate plot. These are area-level screens; local listing, historic curtilage, heritage setting, groundwater and property-specific flood risk remain to be assessed.

NATIONAL LANDSCAPE BOUNDARY

Natural England mapping places the reconstructed plot outside Kent Downs National Landscape, about 675 m from its boundary. This is an approximate boundary check; it does not determine effects on the landscape setting.

STILL TO ESTABLISH

Local-list status, groundwater, sewer flooding, drainage changes and basement suitability remain unverified. The owner confirms the plot is outside the Green Belt. Existing permission conditions, current legal order coverage, boundaries, ground levels and neighbour windows need their own checks. E1 remains the least extensive alteration of the three complete redesigns, but its planning acceptability is not guaranteed.
